

## **Acknowledgements**

The Hispanic Family Profile was originally created at the request of community leaders committed to the welfare of Latino families and children in Illinois. The responsibility for the production and distribution of this document was placed on the Illinois Department of Children and Family Services and its Office of Latino Services. Due to administrative decisions, the profile was not produced in 2001 and 2002.

Recognizing the importance of this document, the Latino Consortium requested Director Samuels to provide his support to continue development of this important document. He graciously acceded to the request, asking the Consortium to take ownership of the development with the support of IDCFS, which provided the for this edition. We are grateful to Director Samuels and IDCFS and his staff for supporting the publication of this document.

The Consortium also thanks other community partners whose advice was helpful in developing this report. Their input contributes significant information about the services Latino families receive from IDCFS and private agencies across the state. In particular, we would like to thank Dr. Maria Vidal and her staff for their assistance in updating this profile.

This profile builds on the contributions made by authors of past profiles and the comments of those who reviewed its different versions. Any errors or miscalculations are wholly our responsibility. We hope that the publication will contribute to an improved understanding of the Latino population and special needs of Latino children and their families. Especially, we hope it will promote a renewed commitment of child welfare practitioners to serve their needs with language and culture appropriate services.
